

Goals for Sprint 3

- Meet with our client so that we can get feedback on features we have implemented and see if anything needs changing. (Ask questions regarding certain features if necessary)
- Look into which users should be allowed into the website and look into how many users we will actually need to account for
- Work on the ingesting of forms
- Work on getting a transactions page in relation to a grant (tab on a grant show page)
- Work on making a view for transactions in relation to a grant
- Get calendar feature working
- Make start and end date come from database
- Get the dashboard page polished up (Main page after logging in will be the grant dashboard)
 - Add export to excel / csv functionality for the grant dashboard (dashboard will be in the form of a data grid)
 - Add a progress bar in terms of time for the specific grants (start date, end date, and current date will need to be accounted for)
 - Research a filter feature for the grant dashboard (allow a user to filter by PI for example. Needs to work with exporting excel and CSV file feature)
 - Make data come from the database instead of being hardcoded for the grant dashboard
- Work on allowing the user to create a grant
- Work on allowing the user to edit specific grant info
- Work on allowing the user to delete a grant
- Make data come from the database instead of being hardcoded when it comes to the visual bar and line charts
- Make a functional show page for a grant (displays information for that specific grant, such as the PI, start and end date, money spent, etc)
 - When on a show page for a grant (Make a tab for visuals, this is where the charts will be placed)
 - When on a show page for a grant (Make a tab for transactions, this is where all information for transactions for a specific grant will be located)
 - When on a show page for a grant (Make a tab for a Budget report)

- A view page will need to be made for the budget report (will also need to be able to be exported)

- When on a show page for a grant (Make a tab for a Effort report)

- A view page will need to be made for the effort report (will also need to be able to be exported)

- When on a show page for a grant (Make a tab for a Employee report)

- A view page will need to be made for the employee report (will also need to be able to be exported)

- When on a show page for a grant (Make a tab for a labor report)

- A view page will need to be made for the employee report (will also need to be able to be exported)

- Make sure that the final draft of the database is implemented in our backend

- Make API changes wherever necessary and fix any issues that come up for the API

- Add user token feature to backend

Yellow - Tasks not yet started

Cyan- Tasks started but not completed fully
